Wind slabs near Buck Ridge

Buck Ridge Northern Madison 3/22/2025 Code SS-N-R1-D1 Elevation 9200 Aspect N Latitude 45.17190 Longitude -111.38000 Notes

We rode into all three Yellow Mule drainages and the head of Muddy Creek. It was snowing hard and wind was blowing strong this morning. In the afternoon, clouds lifted and snow let up. Skies remained mostly cloudy, but with high clouds there was decent visibility at the end of the day. There were 10-12" of new snow since last weekend, 2-4" low density fell this morning.

There was a small wind slab avalanche in McAtee (Photo) and a small wind slab in Beaver Creek.
