

Dry Loose Storm Slabs

Date

Sun, 03/30/2025 - 12:35

Activity

Skiing

Skied the north chutes above fairy lake around 8,400 ft. Found 8-12" of new snow, with the bottom 2" consisting of large graupel. In steep terrain our sluff entrained lots of snow making for some large debris piles. Overall the snow was generally well bonded.

Region

Bridger Range

Location (from list)

Fairy Lake

Observer Name

Spencer Lipsteuer
